What is Invoice Management System (IMS) and the untapped potential for business?

The screenshot shows the 'Accepted Records (2/3)' section of the IMS dashboard. It features a table with columns for S.No, Supplier, Invoice Number, Invoice Type, Amount, Status, and Action. The table contains four rows of data, each representing an accepted invoice record.

S.No	Supplier	Invoice Number	Invoice Type	Amount	Status	Action
1	12345678901234	1001	Reg-Inv	100000	Accepted	View
2	23456789012345	1002	Reg-Inv	200000	Accepted	View
3	34567890123456	1003	Reg-Inv	300000	Accepted	View
4	45678901234567	1004	Reg-Inv	400000	Accepted	View

Introduced by GSTN on 1st October 2024, the **Invoice Management System (IMS)** is a digital platform that helps businesses manage their invoices, Credit Notes, & Debit Notes efficiently under India's GST system.

A Hungry Market!

Automation is the need of the hour.

Like all mandates introduced by the government, such as GSTR filing, e-invoicing, e-way billing, etc., the need for automation solutions will become urgent, suddenly.

Why? Government portals cannot handle large volumes of invoices that companies process. Manual processing IMS requirement is extremely slow and time consuming with many limitations within the dashboard.

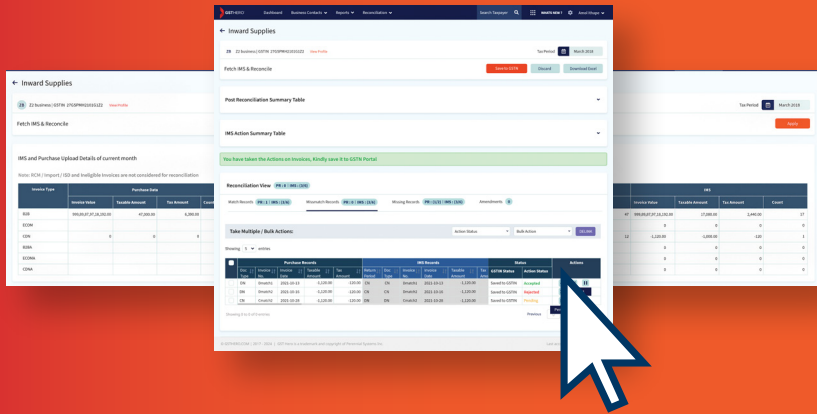

This Window of Opportunity will Shut Soon.

IMS is optional as of now. But this will change soon. Now is the time to capitalize by educating and helping your customers. Once mandated, IMS solution providers will target your existing customers with sub-standard solutions, stealing business - which is rightfully yours.
